Letter from Founders

This past year, we’ve seen dramatic heat waves, floods, wildfires, and hurricanes intensified by the impact of climate change as well as unprecedented disruptions in education from the aftermath of a global pandemic. While the two events seem unrelated, together they offer an opportunity to reimagine education as part of the solution to these pressing issues.

That is why we started SubjectToClimate, an online connector for K-12 educators to find credible and engaging materials on climate change at no cost. We believe that education is the most powerful tool for systemic and generational change—exactly the kind of change that we need to solve the climate crisis. Our innovative work was recently recognized by the Global Warming Mitigation Project as a finalist for the Keeling Curve Prize, a competition for the best global climate solutions. While we are excited about this honor, the bigger win is that education is becoming more prominent as a climate change mitigation strategy.

Since its inception, SubjectToClimate has grown from a small group of founders to a global team of professionals dedicated to advancing climate change education, most of whom have been teachers. We also have a growing teacher taskforce that guides our work to ensure that we are supporting current educators in the field. In addition, we’re excited to have expanded our work by joining the New Jersey Climate Change Education Initiative to adapt our platform for New Jersey educators as they prepare to teach climate change in all subjects and grade levels.

As we look ahead, we understand that asking teachers to teach about climate change in all subjects and grade levels is a tall order given everything they already have to do. We look forward to continuing to launch additional features to help teachers, such as our most recent professional learning database as well as ClimateSocrates, an interactive support center built in collaboration with MIT Environmental Solutions Initiative to answer climate science and pedagogical questions. Most of all, we look forward to continuing to work alongside educators to make climate change teaching and learning accessible to all.

Margaret Wang

David Jaffe
Values

We love our planet...
and we want to save it.

We value teachers...
We are current and former teachers working with educators to develop resources for teachers, by teachers.

We inspire climate action...
By enabling more educators to teach about climate change, we believe that the next generation will be inspired to take climate action.

We believe in justice...
Learning about inequities will enable us to advocate for justice.

We trust science...
Our approach is objective and fact-based.

Mission
To make climate change teaching and learning accessible to all.

Vision
To enhance climate change knowledge and inspire action.
Our Platform

We connect teachers of all grade levels and subjects with credible and engaging teaching resources on climate change. We continue to develop new features to address teachers’ needs. SubjectToClimate 2.0 went live in the summer of 2022 and now includes the following:

**Teacher Resources**
1900+ curated resources from other organizations.

**Lessons by Teachers**
150+ climate change lesson plans written by teachers to show others how to integrate climate change into what they already teach.

**News for Students**
250+ news articles for students that can be differentiated by reading level.

**Professional Learning**
35+ opportunities for teachers to deepen pedagogical and climate change knowledge.

**ClimateSocrates**
100+ climate science and pedagogical help articles, built in collaboration with MIT’s Environmental Solutions Initiative.
StC Impact in Numbers

78 Partners

54 ...teachers have contributed to our resources

100,000 ...unique users since our launch in August 2021

89% ...of our educators are satisfied with what we have to offer.

88% ...of our educators find what they are looking for.

“SubjectToClimate has first-rate resources that are so easy to explore, set up in a way that makes it exceedingly easy to share with my busy teaching colleagues... on a moment’s notice!”

David Kramer, Director of Green Programs, MA
Boston Green Academy, MA
Regional Impact in New Jersey

New Jersey is the first state to include climate change education in all subjects and grade levels. We joined the New Jersey Climate Change Education Initiative (NJCCCEI) to launch the state’s go-to hub for climate change education resources: the New Jersey Climate Change Education Hub (www.njclimateducation.org) (see press release).

The NJ hub is a customized version of our core platform where we:

- Aligned our teaching Resources to New Jersey Student Learning Standards
- Worked with NJ teachers to develop NJ-centric lesson plans that have been reviewed by a rubric to ensure their quality and credibility.
- Collaborated with key NJ stakeholders to be at the forefront of climate change education in New Jersey

We have partnered with EngageNJ to support an AmeriCorps VISTA member, who is serving as a NJ Program Associate and providing technical support and outreach to NJ public schools.

Working with Dr. Lauren Madden from The College of New Jersey, our team has developed a case study on New Jersey’s climate change education efforts to provide key takeaways for states interested in doing the same.
StC in the News

May 2022

**Global Warming Mitigation Project**

StC was named 1 of 4 finalists in the Social & Cultural Pathways for the Keeling Curve Prize. This prize identifies the best climate solutions the world has to offer.

October 2021

**Thinking Global, Educating Local**

StC presented in Columbia Teachers College webinar series “Thinking Global, Educating Local”.

September 2021

**Teaching For Climate Action Initiative**

UNESCO, OECD, and Education International featured Nita Seng, our Chief Learning Officer, and StC in their Teaching for Climate Action initiative.

August 2021

**Harvard Innovation Labs**

Harvard Innovation Labs profiled StC as the only nonprofit organization in the inaugural Harvard Climate Circle Ventures.
Support Us

A gift of any amount supports the work being done at SubjectToClimate to connect teachers to the resources they need to teach climate change in all subjects and grade levels.

Make Climate Change Accessible to All

- $25 curates one professional learning opportunity for teachers to learn about climate change education
- $40 curates one credible and engaging teaching resource for educators to use in the classroom
- $75 powers one pedagogical help article in our Climate Socrates Help Center.
- $250 supports authorship of one weekly blog.
- $600 enables us to collaborate with a current teacher to design a lesson plan for the classroom.
